

RABINDRA KUMAR MAHATO

Software Developer

Janakpurdham, Nepal - 45600

rabindrakrmahato1123@gmail.com — +977 9807641680

PROFILE SUMMARY

Software Developer with hands-on experience in building backend applications using **Java**, **Spring Boot**, **Spring Data JPA**, **Hibernate**, **MySQL** and **RESTful APIs**. Strong knowledge of **Core Java**, **OOP**, **Data Structures**, **SQL** and **software testing** concepts. Experienced in developing and testing **REST APIs**, **CRUD operations**, **authentication**, **role-based access control**, **database integration**, **functional testing**, **API testing**, and **debugging**. Familiar with **Postman**, **JUnit**, **Git**, **GitHub**, **Maven**, **Agile methodology**, **SDLC** and **defect identification**. Strong problem-solving and analytical skills with a keen interest in software quality and test automation.

EDUCATION

Bachelor of Technology – Computer Science & Engineering	2022 – 2026
Parul Institute of Engineering & Technology, Vadodara, Gujarat	
CGPA: 8.07	

Intermediate (+2) Science	2021 – 2022
Mithila Institute Of Technology (Board-NEB)	
Percentage: 73.25%	

Secondary Education	2020 – 2021
Gangotri English Boarding Secondary School (Board-NEB)	
Percentage: 97.50%	

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript

Frameworks: Spring, Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Data JPA, Hibernate, Microservices, JSP, Servlet, JDBC, Django

Databases: MySQL, MongoDB

Frontend: HTML, CSS, JavaScript, React.js

Software Development: SDLC, Agile Methodology, MVC Architecture

Tools: IntelliJ IDEA, Eclipse, STS, VS Code, PyCharm

API & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, API Testing, Database Testing, Test Case Design, Test Scenarios, Bug Life Cycle, STLC, JUnit, Postman

Version Control: Git, GitHub, GitLab

AI Tools: GitHub Copilot, ChatGPT

PROJECT EXPERIENCE

eCommerce Web Application (Appan Bazaar - College Project)

Role: Backend Developer

- Designed and developed a full-featured **e-commerce application** enabling users to browse products, manage **shopping carts**, and place and track orders.

- Implemented scalable backend services using **Java, Spring Boot, Spring MVC**, and integrated the application with a **MySQL** relational database.
- Developed secure and reusable **RESTful APIs** for **CRUD operations** across users, products, categories, carts, and orders.
- Implemented **authentication and role-based access control (RBAC)** using **Spring Security** for Admin and User roles.
- Developed **cart management** functionality including adding, updating, removing products, and managing product quantities.
- Implemented an end-to-end **order management workflow** covering order creation, order details, order status, and order history.
- Designed and maintained relational database entities using **Spring Data JPA and Hibernate**, implementing **One-to-Many and Many-to-One** entity relationships.
- Used **DTOs and ModelMapper** to decouple API request/response models from persistence entities and maintain a clean, modular architecture.
- Applied **Bean Validation** annotations for request validation and data integrity, with centralized exception handling using **@ControllerAdvice** and custom exceptions.
- Implemented **pagination, sorting, search, and filtering** for product APIs to improve API performance and user experience.
- Followed a layered **Controller-Service-Repository architecture** to improve code maintainability, scalability, and separation of concerns.
- Used **Lombok** annotations to reduce boilerplate code and improve code readability and maintainability.
- Tested and validated **REST APIs using Postman**, covering successful requests, validation failures, authentication, authorization, and exception scenarios.
- Managed source code using **Git and GitHub**, following version control practices for collaborative development and project maintenance.

CERTIFICATIONS & ACHIEVEMENTS

- Core Concepts of Java – Devtown (May 2024)
- Full-Stack Web Development – Devtown (January 2025)
- Computer Networks and Internet Protocols – NPTEL, IIT Kharagpur (Jan–Apr 2024)
- Built a full-stack e-commerce application using Java and Spring Boot.
- Introduction to Internet of Things – NPTEL, IIT Kharagpur (Jul–Oct 2025)

STRENGTHS

- Strong foundation in **Core Java, OOP principles, and backend development**
- Good understanding of **Spring Boot, RESTful APIs, and MySQL**
- **Quick learner** with the ability to adapt to new technologies
- **Strong problem-solving and analytical skills**
- Effective team player with **strong communication** skills

PERSONAL DETAILS

Father's Name: Panchlal Mahato

Permanent Address: Ward No-2, Bateshwor, Dhanusha, Nepal

Date of Birth: 05 May 2003

Languages Known: English, Nepali, Maithili, Hindi

Marital Status: Unmarried
